

WIRE MESH CONVEYOR BELTS (CV)

DESCRIPCIÓN DEL PRODUCTO

This belt is composed solely of rods that are bound by lateral types ties "Vaucanson" stairs shaped. Because of its simplicity it allows many applications when operating with light loads.

CV belts are made up with weaving straight and woven rods with wire ropes. All the CV belts can be manufactured with different raw materials such as stainless steel, heat-treatable steel, bronze, and many more.

The edges of these belts can be delivered by welding or clinching, and junctions can be made by spirals or clippers.
